PROFESSIONAL SUMMARY

Builds the detections a SOC runs on. In a university cyber range, stood up a Wazuh, Zeek and Suricata SIEM stack, authored the correlation rules, reconstructed attacks from raw logs, and mapped every technique to MITRE ATT&CK. Final-year Bachelor of Cybersecurity and Behaviour at Western Sydney University (GPA 6.25/7.0, Dean's List), with a behavioural focus that sharpens the instinct for separating real alerts from noise.

TECHNICAL SKILLS

- **SIEM & Detection:** Wazuh, ELK Stack, LogPoint, Zeek, Suricata, Snort
- **Detection & Response:** threat detection, alert triage, incident response, log analysis, correlation rule development, MITRE ATT&CK mapping, phishing analysis, vulnerability assessment
- **Networking:** TCP/IP, DNS, DHCP, VLANs, firewalls, HTTP/HTTPS, SMTP, ICMP
- **Offensive & Recon:** Nmap, Nessus, OpenVAS, Metasploit, Hydra, SET
- **Digital Forensics:** Wireshark, Autopsy, FTK Imager, CyberChef, PhotoRec
- **Threat Intel & OSINT:** VirusTotal, Shodan, AbuseIPDB, IBM X-Force, theHarvester, Sherlock
- **Scripting:** Python, Bash (log parsing, triage automation), Java, JavaScript, HTML, CSS, PHP
- **Systems & Directory:** Linux, Windows, macOS, Active Directory (fundamentals)
- **Cryptography & ITSM:** encryption, hashing, PKI, digital signatures; ServiceNow
- **Languages:** English (Professional), Nepali (Native)

SECURITY & TECHNICAL EXPERIENCE

Western Sydney University - Cyber Range Lab

Parramatta, NSW

SOC & Penetration Testing Intern

Mar 2026 - Jun 2026

- Built and operated a three-machine cyber range (Kali, Windows 10, Ubuntu) that surfaced live attacks in real time, by onboarding host and network log sources into a Wazuh, Zeek and Suricata SIEM stack and writing custom correlation rules per attack path.
- Reconstructed complete attack timelines across every purple-team exercise, by correlating SIEM alerts against packet captures and mapping each technique to the MITRE ATT&CK framework.
- Exposed a live egress-filtering gap by establishing a reverse shell over HTTP and simulating DNS tunnelling with dnscat2, then converted the covert command-and-control path into a documented detection use case for the blue team.
- Authored a runbook-style incident report per exercise (objective, findings, detection evidence, MITRE mapping, remediation) that doubled as a repeatable response playbook.

Kathmandu Meridian School

Kathmandu, Nepal

IT Support

Jun 2023 - Jan 2024

- Cut system downtime by 30% for 100+ users, by standardising proactive troubleshooting and first-line incident response across desktops, laptops and mobile.
- Hardened the campus network with VLAN segmentation across 10+ access points and switches, improving throughput and security.

PROJECTS

CyberGuardAI - AI Scam and Deepfake Awareness Platform

Mar 2026 - Jun 2026

- Built a Python and Streamlit web app that flags scam and deepfake threats and walks the user through the correct response, grounded in behavioural-nudge research (Thaler, Kahneman, Gollwitzer).
- Designed it end to end with Design Science Research methodology, turning behavioural theory into real-time prompts a non-technical user can act on.

Social Engineering Spyware Attack (Controlled Lab Exercise)

Oct 2024

- Compromised a Windows 10 host in an isolated lab via a Metasploit payload for remote CMD access, then documented the weakness and its detection points.

CERTIFICATIONS & VIRTUAL EXPERIENCE PROGRAMS

TryHackMe - SOC Analyst Level 1 (SAL1)

In progress

- Hands-on SOC certification: alert triage, threat detection, correlation and incident response in a SOC simulation.

Deloitte Australia - Cyber Job Simulation (Forage)

Jun 2026

- Analysed web activity logs during a simulated breach to flag suspicious activity.

Mastercard - Cybersecurity Virtual Experience (Forage)

Jun 2026

- Reported phishing threats as a Security Awareness Team analyst and assessed team training needs.

AIG Shields Up - Cybersecurity Virtual Experience (Forage)

Jun 2026

- Tracked CISA advisories and wrote a Python brute-force decryption script to avoid ransom payment (ethical exercise).

EDUCATION

Western Sydney University

Bachelor of Cybersecurity and Behaviour

Parramatta, NSW

Mar 2024 - Present

- **GPA 6.25/7.0, Dean's List 2024.** Relevant coursework: Ethical Hacking, Software Engineering, Databases, Artificial Intelligence.

Malpi Institute

A-Levels: Mathematics, Physics, Computer Science, Business Studies

Kathmandu, Nepal

Jun 2021 - Aug 2023

ADDITIONAL PROFESSIONAL EXPERIENCE

Avion International

Warehouse Supervisor / Warehouse Associate

Wetherill Park, NSW

Nov 2024 - Present

- Drove a 25% efficiency gain after promotion to Supervisor, by closing process gaps with corrective access and inventory controls.
- Enforced access controls and audit trails on high-value inventory, the same verification discipline that underpins log review and security monitoring.

Woolworths

Team Member

Bass Hill, NSW

Oct 2024 - Nov 2025

- Maintained near-zero transaction error through peak trading under strict loss-prevention procedures.

LEADERSHIP & ACTIVITIES

Vice-President, Nepali Students at Western Sydney University

Jan 2026 - Present

- Organise campus events (Welcome Fest, Bhet Sanjha), coordinating logistics, promotion and volunteers.

President, Computer Science Club, Kathmandu Meridian School

Jan 2019 - Jan 2020

Community Volunteer, Local Food Bank, Kathmandu Food-package distribution and donation drives. Sep 2019 - Jan 2024
